Most important symptoms: Direct contact causes severe eye irritation and possible damage. Causes skin irritation in some individuals. May cause allergic skin reaction in sensitive individuals. Inhalation of mists may cause mild respiratory irritation. Ingestion may cause gastro-intestinal irritation, nausea, vomiting, and diarrhea.

Indication of immediate medical attention and special treatment, if needed: Immediate medical attention may be required for direct eye contact.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media: Use any media appropriate for the surrounding fire.

Specific hazards arising from the chemical: Thermal decomposition releases oxides of carbon. This product is not classified as flammable or combustible.

Special firefighting procedures: Firefighters should wear self-contained breathing apparatus and full protective clothing for all fires involving chemicals.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures:

Keep unnecessary personnel away. Ventilate the area. Do not touch or walk through spilled material.
